-----  
Who is responsible for streetlights in San Diego?

The Street Division is responsible for all the streetlights in the City of San Diego. The City of San Diego has over 55,000 streetlights in operation. Nine thousand of these lights belong to local community "Lighting Districts," which pay a special assessment fee to support the additional or ornamental lighting in their neighborhoods.

Does San Diego have streetlights?

We also share responsibility with Caltrans for lights on the freeway off/on ramps that intersect city streets. Currently, there are two types of streetlights in San Diego: Induction lights, which emit white light, and Low-Pressure Sodium (LPS) lights, which emit a monochromatic yellow light.

How did San Diego reduce street light energy use?

San Diego upgraded its street lighting with LED fixtures and adaptive controls to measure and control energy use, and worked with the local utility to establish more favorable billing rate structures for efficiency measures. As a result, the City cut street light energy use by more than 50% from 2010 to 2015.

What type of street lighting is used at Palomar Observatory?

Induction lighting is the City's standard type of street lighting. Because of the need to limit light pollution that affects Palomar Observatory, LPS is used in all areas within a 30-mile radius of the Observatory.
