-----

This 10MW solar farm is a direct and powerful response to that challenge, diversifying the energy mix and paving the way for a more stable and self-sufficient power supply. Powering the ...

The Seychelles enjoy favourable conditions for renewable energy (RE) resources, such as wind and solar. However, renewable energy has been very little tapped so far - the only renewable energy ...

As energy costs rise and sustainability becomes a priority, integrating a residential energy storage system with solar power is an intelligent solution for villas.

The objective of the proposed project is to increase the use of grid-connected photovoltaic (PV) systems as a sustainable means of generating electricity in selected main islands and smaller islands of the ...

In collaboration with Frupak and the Ceres Municipality, SPS implemented an innovative project designed to alleviate pressure on the municipality to provide power during peak times.

This tropic-proof rooftop solar system is installed on the back of house buildings of Platte Island. The system here helps to power the island primarily with Solar energy during daytime.

Therefore, we have experience with grid-tied roof top solar PV system. Also we are an approved installer by the Seychelles Energy Commission and Public Utility Corporation.

A PV system installed on a roof with a high pitch can dramatically decrease the yield which a system produces. The optimum angle and orientation for a PV system installation in the Seychelles would be ...

Nestled on a beautiful island close to the equator, SPS designed, funded, and commissioned a 3.2MWp solar PV system. The solar modules are strategically positioned to face the East & West for optimal ...
