Are electric vehicles the future in Singapore?

Electric vehicles (EVs) are no longer just the future--they're the present in Singapore. With rising consumer demand, government incentives, and an influx of new brands, especially from China, the local automotive landscape is rapidly evolving.

How many EVs are sold in Singapore?

The trend is continuing: 13.26% of cars sold during the first quarter of 2023 were EVs (including plug-in and battery-electric cars). The overwhelming majority of vehicles in Singapore are four-wheelers; two- and three-wheelers account for only about 10% of all vehicles.

How EVs are being adopted in Singapore?

The government has outlined bold plans to incrementally replace internal combustion engine (ICE) vehicles and promote the transition to EVs to reduce carbon emissions and combat climate change. Various initiatives and policies have encouraged EV adoption in Singapore to make ownership more attractive and accessible.

Why are EVs becoming popular in Singapore?

BYD, a Chinese EV giant, recently made history by becoming the best-selling car brand in Singapore in 2024, a feat that underscores the growing dominance of EVs on Singapore's roads. The surge in EV adoption in Singapore can be attributed to several factors, including government incentives and increasing consumer acceptance.

Policies Driving an electric car more than halves our carbon footprint, compared to driving a similar car powered by an internal combustion engine. Electric vehicles (EVs) are also less pollutive ...
