EcoDirect designs and supplies solar + battery projects in Micronesia. Our team has the tools and experience to get your next project designed and delivered.

In addition, the policy establishes the following guiding principles for energy development in the Federated States of Micronesia: (1) the spread of benefits to disadvantaged communities, (2) ...

The Federated States of Micronesia are investing in solar micro-grids and battery energy storage systems as well as capacity building to increase self-sufficiency and reduce emissions.

The country is striving to overcome electricity access needs, reduce high energy costs, and ensure energy security. Currently, almost all of the electricity produced in Micronesia is dependent upon ...

A tender is open in Micronesia for the engineering, procurement and construction of hybrid solar minigrid systems at three villages on the Fefen Islands. The closing date for applications...

New grid-connected solar generation and battery storage systems in Chuuk and Pohnpei will help FSM meet its goal of 70 percent renewable electricity by 2030, while cutting greenhouse gas ...

A total of 10 feasibility studies are being carried out across 10 separate islands in the Chuuk group of the Federated States of Micronesia. These studies will determine the best way to ...

With over 600 islands scattered across the Pacific, Micronesia faces unique energy challenges. Did you know that 90% of electricity in this region comes from imported diesel?
