Jerusalem, 26 June, 2025 (TPS-IL) -- It is now mandatory in Israel for the construction of solar energy production facilities on the rooftops of all non-residential new buildings.

Israel has introduced requirements for PV system installations on all new non-residential buildings with rooftop areas above 250 square meters and new detached residential buildings with ...

OverviewSolar power stationsHistory and developmentFeed-in tariffEducational and research facilitiesFinance and businessSee alsoExternal linksThe Negev Desert and the surrounding area, including the Arava Valley, are the sunniest parts of Israel, and little of this land is arable, which is why it has become the center of the Israeli solar industry. David Faiman thinks the energy needs of Israel's future could be met by building solar energy plants in the Negev. As director of Ben-Gurion National Solar Energy Center, he operates one of the largest solar dishes in t...

Discover how installing solar panels in Israel can transform your energy consumption. Take advantage of favorable subsidies and regulations to reduce your electricity bills while ...

In a significant step toward increasing Israel's energy independence and reducing emissions, new government regulations will require the mandatory installation of solar energy ...

Later this year, Israel will become one of the first countries in the world to require the installation of solar panels on roofs, according to new regulations approved by the National...
