The potential is large, but it will only be unlocked with favourable framework conditions. This article analyses how Norway's regulatory landscape for solar energy is changing rapidly.

A rapidly growing sunspot has fired off at least 18 M-class and three X-class flares in just 24 hours, including an intense X8.3 eruption.

Company: Solgrid is an energy company that develops, finances, builds and operates solar power plants in Nordic markets. This is pioneering work given Norwegian conditions. It has been challenging, ...

Wind and Solar Energy Projects in the Midwest. Wind and solar energy in Iowa, Illinois, Indiana, Michigan, Minnesota, Missouri, North Dakota, South Dakota, and Wisconsin.

On July 4, 2025, President Trump signed into law Congress's budget reconciliation bill, H.R. 1--commonly known as the One Big Beautiful Bill.

In this guide, solar energy systems are defined as either photovoltaic systems or solar collectors that are established on buildings. This includes both building-adapted and building-integrated solutions. The guide ...

The Solar Massachusetts Renewable Target (SMART) Program compensates homeowners for their solar electricity production. Here's how it works.

What's Next for the OBBB and the Solar Tax Credit? The release of the text today is an important but incremental step in the process. Next, the Bill must be voted on and approved by the ...

Getting your utility-scale solar project connected to the Norwegian regional grid involves a series of essential steps, ensuring smooth integration with the power system.

Space weather has seen a flurry of activity this week. An explosive solar flare that erupted Tuesday, just two

# Solar lighting power system in Norway

days after the sun unleashed one of its most powerful flares, temporarily disrupted ...

Wind generation has been traditionally concentrated in the central part of the country, such as in the grid operated in the Midwest by the Midcontinent Independent System Operator ...

Norway is strategically enhancing its renewable energy landscape, focusing on integrating solar power with other green sources and modernizing its grid infrastructure to meet ambitious climate goals.
