-----

In the first half of 2025, cells and wafers made up over 40% of China's exports of solar products. Cells account for a bigger share than wafers for the first time. China's solar export market ...

Between 2025 and 2029, global solar photovoltaic capacity additions are projected to increase yearly and range from some 655 gigawatts in 2025 to 930 gigawatts in 2029.

India is a major supplier of solar panels to the US, with 97% of its module exports, totaling 10.4 GW, destined for the US in the first nine months of 2025. Interestingly, the trade deal came ...

Solar PV Global Supply Chains - Analysis and key findings. A report by the International Energy Agency.

China's total module exports from January to September 2025 reached 206 GW, up 10% YoY from 187 GW. In September 2025, the top five single-country importers of Chinese modules ...

In conclusion, China's solar module exports in 2025 tell a story of adaptation and enduring strength. Despite internal and external pressures to manage oversupply, the industry ...

In Q1 2025, the total exports were 61.9 GW, which means Chinese suppliers exported 65.4 GW in Q2 (see Chinese Solar Module Exports Decline By 8% YoY in Q1 2025). According to ...

At current solar module prices, few independent U.S.-owned module producers will be able to remain in business long-term. Several companies have already cancelled plans to build new facilities. Within ...

o The resulting revenue uncertainty--which may slow PV growth after 2025 --will be greater for small-scale solar than for utility -scale solar, because small-scale projects had benefited ...

The AD/CVD case on solar cells and modules from Cambodia, Malaysia, Thailand and Vietnam, which began in April 2024 and was finalized on May 20th, 2025, increased module costs by ...
