Under the unyielding gaze of the sun, Boundiali, a town in Ivory Coast, hosts the nation's inaugural solar power plant, symbolizing a dual commitment to clean energy and traditional fossil fuels.

Government initiatives, such as the National Solar Energy Program and tax incentives, have fueled the rapid adoption of solar power, empowering households to reduce their reliance on ...

The Ivory Coast has initiated multiple solar power projects to increase the share of renewable energy in the energy mix and reach universal electricity access by 2030.

By 2030, Ivory Coast has pledged to increase its share of renewable energy to 45 percent, including nine percent solar, and to reduce its greenhouse gas emissions by 30 percent.

AMEA Power is advancing construction on its 50 MW solar PV project in Ivory Coast, a significant development that moves the initiative from agreement to execution. This project is a ...

Boundiali photovoltaic solar power plant in northern Ivory Coast was built in partnership with the country's government, in particular CI-ENERGIES, and with financial support from Germany.

The Ivory Coast is set to begin construction of the \$63.5 million Ferke Solar power plant in Sokoro, which will have an installed capacity of 52 MW. Announced by government spokesperson ...

According to the government's website, there are plans for 12 new solar plants with a combined capacity of 628 MWp. Two of the projects - a 52 MWp installation and a 50 MWp array in ...

Panel discussions will offer insights into the status of renewable energy across West Africa, including Ivory Coast, and highlight investment opportunities, especially in solar power.

Solar panels on the roof of the Ivory Coast government

The plant, launched in June 2023, spans 36 hectares and boasts 68,000 solar panels. Plans aim to double capacity to 80 MWp by 2024, funded by local, German, and EU sources.
