Solar energy is leading the way, with much of the new development occurring on farmland and in rural communities. It has the potential to be a financial opportunity for landowners, yet it can ...

With input from experts and AFT partners, AFT has developed a suite of policy recommendations for all levels of government that will protect farmland, farm viability, rural economies, and agricultural land ...

The Solar Energy Technologies Office (SETO) is researching the opportunities and trade-offs of agrivoltaics. This guide helps answer some questions that farmers may have about going solar and ...

Solar and farming in the same land area can retain functional use of farmland while adding emissions-free power generation. In the United States, up to 83% of new solar ...

Solar and farming in the same land area can retain functional use of farmland while adding emissions-free power generation. In the United States, up to 83% of new solar development by 2040 ...

Agrivoltaics can help diversify a farmer's income with an annual rental fee from the solar developer and, through an agreement with the solar developer, revenue from the sale of crops or ...

This farmer-centered approach ensures that the land under the solar array is actively used for agriculture, helping to mitigate the loss of farmland. One notable benefit of agrivoltaics is that it ...

With continued research, supportive policy, and adaptive financial models, agrivoltaics has the potential to align farmer needs, developer interests, and community priorities. Across the ...

These four key policy priorities should be taken into account to set the foundation for the agrivoltaic revolution: 1. Make requirements flexible to allow farmers to dictate agricultural ...

ventional solar development is advancing at a rapid pace. As evident in states--like Massachusetts and New

Solar power generation farmer policy

Jersey--and in countries--like Italy, France, and Germany--policies and programs ...

Prioritize solar development on buildings and, for conventional solar, on land that is not well suited for farming. Set policies and practices to safeguard soil health where land is used for ...
