With China implementing major changes to its solar market design this year, a temporary dip in global growth in 2026 appears very likely. Meanwhile, other regions are falling behind, ...

This chart shows the levelized cost of energy generation by source (in U.S. dollar per MWh).

Due to limited data availability, we use the Global Price Index series reported by IRENA, based on pvXchange benchmark prices for modules sold in Europe. Historical prices have been ...

Get the latest insights on price movement and trend analysis of Solar Energy in different regions across the world (Asia, Europe, North America, Latin America, and the Middle East & Africa).

Comprehensive 2025 guide to renewable energy costs. Compare solar, wind, and clean energy pricing vs fossil fuels. Includes latest LCOE data, trends, and projections.

The latest cost analysis from IRENA shows that renewables continued to represent the most cost-competitive source of new electricity generation in 2024.

The financial calculus that makes solar self-generation in AU work now is low-cost residential rooftop solar electricity production that displaces much higher cost grid power.

Table 2 shows a full listing of the overnight costs for each technology and electricity region, if the resource or technology is available to be built in the given region.

The typical home solar system is about 5 kW or around 20 solar panels. While solar prices are expected to go down in 2024, they will still be 10-15% higher than in 2020.

These benchmarks help measure progress toward goals for reducing solar electricity costs and guide SETO
