A solar generator keeps appliances running during a power outage or during travel. Here's what you need to know about this technology.

A solar generator is a portable system that captures energy from sunlight using photovoltaic (PV) panels and stores it in a battery for later use. These systems are typically used as alternative or backup power sources in off-grid settings, emergency situations, and outdoor activities. Unlike fuel-based generators, solar generators operate silently and without emissions, making them an environmentally friendly energy solution.
