Africa recorded its highest-ever solar capacity additions in 2025, with a 54% year-on-year increase, led by South Africa and Nigeria. South Africa added 1.6 GW, Nigeria 803 MW and Egypt ...

Find out the full story behind South Africa's 12% growth in solar power, including how they achieved it and what the future of solar looks like for S.A.

Solar power in South Africa includes photovoltaics (PV) as well as concentrated solar power (CSP). As of July 2024, South Africa had 2,287 MW of installed utility-scale PV solar power capacity in its grid, ...

The government of South Africa formally approved the country's renewable energy masterplan earlier this year, aiming to deploy at least 3 GW of new renewables per year, increasing ...

Africa recorded its strongest year for solar energy growth in 2025, with South Africa and Nigeria emerging as the leading contributors to new capacity, policy progress, and private-sector ...

South Africa added approximately 928 MW of solar during the first quarter of this year, according to estimates from SAPVIA. The figure consists of 280 MW from projects commissioned ...

South Africa's energy sector stands at a defining crossroads, where policy ambition, infrastructure readiness, and market reform are converging to shape the future of renewable ...

Africa's solar energy market continues to grow significantly. In 2025, the continent added more than 5,000 MW solar power capacity. In this article, we breakdown countries leading this drive.

Most areas in South Africa average more than 2 500 hours of sunshine per year, and average solar-radiation levels range between 4.5 and 6.5kWh/m² in one day. The southern African region, and in ...

Solar has risen from almost nothing in 2019 to roughly 10 percent of South Africa's electricity-generating

South africa solar power

capacity. No longer do South Africans depend entirely on giant coal-burning...
