With extremely high SEER, moisture condensation active control and other cut-edge technologies, it protects power and electronic equipment by providing precise temperature and humidity control.

Our temperature-controlled electrical cabinets feature weatherproof, waterproof designs for 19" server racks, fiber distribution & cell tower equipment. Trusted by telecom operators for reliable climate ...

Although the most rugged types of telecom equipment can operate without heating and cooling, most outdoor telecom cabinets are designed to comply with the GR-3108-CORE Class 1 specification, ...

The Base Station Energy Cabinet is a fully enclosed, weather-resistant telecom energy cabinet designed to provide reliable power distribution and battery backup for outdoor communication networks.

It comes in two variants i.e. south & north type based on ambient temperature and further sub classified according to the cabinet dimensions i.e. integrated (A/C) and split type (B/D) cabinets.

GL has designed climate controlled outdoor cabinets that house sophisticated electronic equipment, such as computers and servers consisting of microprocessors, fiber optic devices, Ethernet routers ...

The cabinet can be equipped with various communication equipment, rectifier power supply system, monitoring unit, battery, optical fiber, etc. Suitable for use in streets, building tops, mountain tops, ...

Use heaters and air conditioners to control temperature and reduce moisture. Choose cabinets with high IP or NEMA ratings for better protection. Regular maintenance and monitoring ...

An accurate monitoring system has been implemented in terms of control and wiring, which can collect and analyze temperature and humidity changes inside and outside the electrical cabinet in real time, ...

Southwest Communication Power Supply Cabinet

Taking into account the -48V DC voltage commonly used in the communications industry, we deliberately designed the use of dc-48V power supply as the air conditioner power supply. This ...
