This is a solar power generation device with a petal-like structure that can rotate and fold, and is installed on the ground. Its petals unfold when the sun rises and it keeps tracking the sun to ...

Unlike traditional rooftop systems, the Sunflower solar system is a ground-mounted, all-in-one solution that arrives pre-assembled and begins generating power immediately after installation.

Smartflower solar panels unfurl in the morning and track the sun across the sky. In a world filled with countless rectangular solar panels, Smartflower is a rare, novel solar product.

Generate up to 6500 kWh of solar energy in your backyard with the SmartFlower--a self-cleaning, sun-tracking, and stylish renewable energy solution.

A complete review of Smartflower solar (solar flower) modules and whether they are worthwhile investment for homeowners.

SmartFlower puts it on display. The system opens like a giant metal sunflower each morning, follows the sun all day, and folds itself to rest at night. It is more than a pretty sight. The ...

Discover SmartFlower, the groundbreaking solar energy system that combines art and technology and offers up to 40% more energy efficiency compared to traditional solar panels

The Smartflower is a revolutionary solar technology that takes much of the hassle out of setting up an off-grid solar energy system. This device is a free-standing sculpture shaped like a ...

SmartFlower uses advanced robotics and automation to track the sun, generating up to 40% more energy than traditional solar panels. Every day at sunset, SmartFlower will automatically fold up and ...

Sunflower-type solar power generation device

Much like a real flower, the system unfolds its petal panels when the sun rises. The Smartflower then directs its petals toward the sun at a 90-degree angle and almost immediately begins to produce ...
