Switzerland is rapidly scaling up solar energy, with new laws requiring solar panels on all new buildings. The country is increasing wind energy capacity, especially in regions with favorable ...

With the passage of the Federal Act on a Secure Electricity Supply from Renewable Energy Sources, approved by public referendum in June 2024, the country is implementing sweeping ...

Trade body Swissolar has called for a national energy storage strategy to support the rising popularity of home solar-plus-battery systems in the country. In Switzerland, roughly every ...

New Swiss Energy Policy Opens Doors for Storage Innovation Starting Jan 2026, Switzerland's new solar + storage regulations will expand opportunities for integrated PV + BESS +...

Switzerland is expanding rules for rooftop solar, energy storage, and energy communities to expand self-consumption and ease pressure on the grid. The new regulations, set to take effect in...

These fluctuations can be balanced out by making smart use of wind and solar energy. The key is to have large energy storage systems. If wind turbines or PV plants produce surplus ...

With its hydroelectric power plants in the Alps and innovative projects, Switzerland is contributing to the search for solutions for the efficient, long-term storage of electricity. I cover...

Discover Switzerland's ambitious new targets for solar energy, aiming for 34 TWh by 2050. Learn how new laws and cantonal goals are shaping its renewable future.

These new regulations, which will take effect on January 1, 2026, focus on energy communities and minimum remuneration. The aim of these measures is to encourage self ...

Swiss new energy solar energy storage policy

Swiss voters have approved a new electricity regulation requiring large buildings to install photovoltaic systems to support power communities and encourage collective energy self-consumption.
