We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U.S. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory ...

The future of renewable energy relies on large-scale industrial energy storage. Megapack is a powerful, integrated battery system that provides clean, reliable, cost-effective energy storage to help stabilize ...

We tested and researched the best home battery and backup systems from brands like EcoFlow and Tesla to help you find the right fit to keep you safe during outages or reduce your ...

Tesla has landed a massive contract with Intersect Power for an unbelievably large battery energy storage system (BESS) project using 15.3 GWh of Megapack for its needs.

The massive project is located in Kern County and combines solar generation with Tesla's Megapack batteries, creating one of the largest solar-plus-storage installations in the U.S. ...

The energy company is known for its large and adaptable Battery Energy Storage Systems (BESS) at its solar and storage facilities in Texas and California. The Megapacks are set for ...

Tesla has agreed to supply US solar PV and energy storage developer Intersect Power with 15.3GWh of its Megapack battery storage solution.

At an event in Las Vegas on the margins of the RE+ renewable energy convention, Tesla unveiled its latest generation of large-scale energy storage products. As expected, Tesla unveiled...

Whether you are an industry professional or a policymaker, understanding the Tesla megapack battery specifications and capacity details is essential to improve its impact on the future ...

On September 9, 2025, Tesla unveiled the next generation of its utility-scale battery systems -- the Megapack

Tesla large battery power systems

3 and a new Megablock product -- designed to accelerate deployment, increase per-unit ...
