---

China Three Gorges Group has connected to the grid a 1 GW hybrid concentrated solar power (CSP) and photovoltaic (PV) project in Hami, Xinjiang. The facility, described as the largest ...

Currently, the securitization of the power generation assets of the six giant power stations on the main stream of the Yangtze River has been completed. CTG adheres to a development philosophy that ...

This project features two 50 MW towers and solar fields that will collectively feed solar energy into a single 100 MW power block. The novel design aims to address the issue of optical ...

China Three Gorges Group has connected to the grid a 1 GW hybrid concentrated solar power (CSP) and photovoltaic complex in Hami, Xinjiang, in what is described as the world's largest ...

Since its inception, CTGI has adhered to green and low-carbon development, with all of its power stations being clean energy ones. We aim to be a builder of a clean and beautiful world and ...

Located in the Wutumeiren Solar Power Base in Golmud City, Haixi Prefecture, Qinghai Province, the project features a 100MW molten salt tower-type solar thermal power generation unit.

Three Gorges is the world's biggest renewable energy firm, having built the largest renewable project in the world, China's 22.5 GW Three Gorges Dam which harnesses pumped hydro ...

It has a total investment of approximately 4.93 billion yuan and will construct a 100MW solar thermal power generation + 200MW photovoltaic power generation + 400MW wind power generation facility.
