How many batteries can a trolling motor battery box fit?

This trolling motor battery box has some of the coolest extras you want when you look for a smart box. The box itself can fit group 24 and group 27 batteries. It's lightweight and even features a convenient carrying handle. The more battery boxes you see, the more you realize that's a weirdly overlooked feature.

What kind of batteries do trolling motors use?

Trolling motors use "deep cycle" batteries--meaning the batteries can be discharged almost completely multiple times. As you know, fully discharging a car battery will kill it very quickly. In terms of technology, there are two main choices: traditional lead-acid batteries and lithium batteries.

What is a smart battery box power station?

Your purchasing power is . More shipping options available at checkout. The Smart Battery Box Power Station is a fully functioning power and charging station. A perfect solution for protecting your single 12V battery (not included) while providing quick and clean access to hook up your trolling motor's power cables to the smart box's terminals.
