Despite the many challenges of building energy projects in a war zone, Ukraine's largest battery energy storage project has entered its final delivery phase - ahead of schedule.

The project includes six battery energy storage systems of varying capacities - from 20 to 50 MW each - connected to the Ukrainian power grid. Collectively, the systems have the capacity to store 400 MWh of ...

Ukrainian private energy firm DTEK has launched the country's largest battery storage facility to ensure stable power supplies in the face of Russian attacks on Ukraine's energy sector,...

In 2025 Ukraine deployed around 1.5 GW of new solar capacity driven by strong interest in co-located battery energy storage systems. BasenPower breaks down the key drivers, policy enablers and ...

DTEK and Fluence have begun commissioning Ukraine's largest battery energy storage system, a 200 MW/400 MWh installation spread across six sites that represents one of the biggest storage...

DTEK CEO Maxim Timchenko called the project 'a historic step for the Ukrainian energy system that will determine its development for years to come'. The company has reported that it is considering ...

Completed in only six months, the project was commissioned entirely remotely. Ukrainian private utility DTEK has energised the largest battery storage project in the war-torn country and one of the biggest ...

DTEK Group, a private investor in Ukraine's energy sector, has announced a EUR140m investment plan to construct a series of battery energy storage systems (BESS) in the country with a combined ...

Ukraine's biggest private energy firm, DTEK, has launched a major battery storage facility that will bring power to hundreds of thousands of homes and strengthen the grid ahead of expected Russian ...

Ukrainian new energy storage battery application

Six new battery storage systems of varying capacities - from 20 to 50 MW each - have been connected by DTEK to the power grid in the Kyiv and Dnipropetrovsk regions. Collectively, they have the ...
