University of Houston -- The Energy University -- is part of one of the national hubs, the Energy Storage Research Alliance (ESRA). Progress in energy storage and batteries is crucial for a ...

CEI researchers are pushing the envelope on batteries that can store much more energy than current lithium-ion cells. The goal is to develop breakthrough, but low-cost, materials and battery designs ...

As new technologies consume more power and alternative energy sources become increasingly necessary to fuel Iowans' lives, Iowa State University researchers are working to create ...

Research at the University of Virginia School of Engineering and Applied Science could help unlock a new energy storage method, potentially helping solve one of the biggest problems in ...

Universities can adopt phased upgrade strategies and modular retrofits. In this evolving environment, alternative energy technologies like geothermal, battery energy storage, biomass and ...

Most university campuses have a considerable energy consumption and dense infrastructures being able to serve as an opportunity for sustainable energy management.

Researchers have created a more energy dense storage material for iron-based batteries. The breakthrough could also improve applications in MRI technology and magnetic levitation.

Maximizing the benefits of clean energy requires new ways to store it, and University of Michigan engineers will partner in a new research hub created by the U.S. Department of Energy ...

A variety of approaches are being used to store energy, including electrochemical and thermochemical storage. In each of these areas continued research and development is required to enable ...
