At the Ashalim Solar Power Station in the Negev desert in Israel, more than 50,000 computer-controlled heliostats, each made of 4 solar mirrors, track the sun and reflect sunlight onto a boiler (the solar ...

Crafted with heat-treated safety glass, our photovoltaic glass provides the same thermal and sound insulation as traditional options, flooding spaces with natural light. Perfect for facades, curtain walls, ...

Thanks to the expected CO2 savings (scope 2), the Guardian Glass project at Bascharage contributes to efforts to meet the European Union's ambitious targets of reducing its greenhouse gas emissions ...

Since most modules have a glass cover for integration into the building envelope, the German and European glass industry could add a lot of value here, either by supplying glass or ...

Imagine turning every skyscraper window into a power generator - that's the promise of photovoltaic glass technology. As global demand for renewable energy surges, this innovative material is bridging ...

In addition to a standard roof-top system, our particular customized glass-glass modules have been integrated into the facade surface which do not only generate energy but also comply with all legal ...

In 2022, 125 tons of end-of-life glass were collected from the tower, then treated and recycled as external cullet in the furnace of the Saint-Gobain Glass float plant in Calarasi, Romania.

So we have invested a lot of time and money in research and development of modern special glasses for photovoltaic and solar thermal applications. As Europe's largest producer of structured solar ...

Our platform aims to support the EU's RepowerEU and Renovation Wave initiatives by connecting the solar and building sectors, ensuring a "Made in EU" BIPV industry, and coordinating strategic actions ...

Western Europe Bay solar Glass Base Project

According to EU data, while EU domestic photovoltaic installed capacity reached 56GW in 2023, Europe's total solar glass production capacity was less than 8GW. The remainder was ...
