---

Dominica's geothermal project is set to deliver power to the island as well as the foundation for a large scale green hydrogen complex.

The Government of the Commonwealth of Dominica has signed a Framework Agreement that will initiate the first large-scale green hydrogen geothermal development in the Caribbean.

The Caribbean island is building a power station that will use steam naturally heated by volcanic rock.

"It will involve the construction of a hydrogen production facility which could produce 27 to 30,000 tons of hydrogen per year and 240 to 250,000 of oxygen per year."

According to the agreement, the joint venture company will be established to raise investments and deliver the large-scale geothermal production for a green hydrogen complex. The ...

Dominica does not yet have a fully established hydrogen sector but holds potential for developing a green hydrogen industry due to its abundant renewable energy resources, particularly ...

The Government of the Commonwealth of Dominica has signed a Framework Agreement that will initiate the first large-scale green ...

Known as the " Nature Island of the Caribbean ", it leverages its abundant natural resources, geothermal, hydroelectric, solar, and wind energy, to reduce reliance on imported fossil fuels, lower ...

With less than 300sq. miles of land, the Caribbean Island has potential to develop over 1GW of geothermal capacity, while the government has been exploring a green hydrogen industrial ...

The Commonwealth of Dominica's government has signed a Framework Agreement that will kickstart the

# What are the hydrogen energy stations in Dominica

Caribbean's first large-scale green hydrogen geothermal development.
