Solar control glass is a hi-tech product developed by the glass industry to allow sunlight to pass through a window or facade while radiating and reflecting away a large degree of the sun's heat.

In short: all new windshields are made of laminated glass consisting of two glass sheets bonded together with a transparent plastic interlayer (PVB). The good news is that your windshield ...

What Is Solar Windshield Glass? Solar (sometimes called "solar control" or "UV-resistant") glass is an advanced laminated windshield that incorporates heat-absorbing interlayers and micro-thin metallic ...

I'll be leaving all of the rear glass untreated, as I'm satisfied with the protection level there. The front windows will technically be a touch darker, but with the light coming in from the ...

Embedding solar glass on a car helps save energy by reducing the intensity of the sun's heat to keep the interior cooler. To understand how this works, this post will discuss the construction and mechanics ...

When looking at aftermarket tint (specifically ceramic for heat blocking), I noticed that my windshield and front side windows have an etching indicating they are "Kia Solar glass"; with a factory ...

Preparing materials for solar module glass (both front and back) is a highly specialized process because the glass serves as the primary shield for the delicate silicon cells.

The solar coated windshield absorbs the Sun's Infrared (IR) rays that cause excessive heat and brings down the interior temperature of the vehicle and increases cabin comfort.

Solar windshield glass is a new technology that allows you to use your car's windshield as a solar panel. Its thin layer of glass is designed to absorb sunlight and convert it into electricity, ...

Do you need or have an infrared reflective windshield? Read our guide to see the benefits of IR glass and the
