---

The USA: Solar electricity generation, percent: The latest value from 2023 is 5.68 percent, an increase from 4.84 percent in 2022. In comparison, the world average is 4.92 percent, based on data from 185 ...

Together, solar was nearly 7% (6.91%) of total US electrical generation for the year. In December alone, electrical generation by utility-scale solar expanded by 42% compared to December...

4.4% of our global energy comes from solar power. China generates more solar energy than any other country, with a current capacity of 308.5 GW. The US relies on solar for 3.9% of its ...

Solar energy accounted for some 6.91 percent of electricity generation in the United States in 2024, up from a 5.62 percent share a year earlier.

This dataset contains yearly electricity generation, capacity, emissions, imports and demand data for European countries. You can find more about Ember's methodology in this document.

Over the past 12 months, solar photovoltaic sources accounted for more than 6.8% of all electricity generated in the U.S., up from 5.5% in 2023, a 24% year-over-year increase, according to ...

According to our Electric Power Annual, solar power accounted for 3% of U.S. electricity generation from all sources in 2020. In our Short-Term Energy Outlook, we forecast that solar will ...

In 2023, solar energy accounted for roughly 5.5% of electricity generation worldwide, up from 4.6 percent share a year earlier. Wind and solar generated nearly 12% of global electricity.

In 2022, 4.6% of the world's electricity generation came from solar energy, an increase from the previous year. China consumed the largest share of the world's solar energy at 32.3%, with ...

# What percentage of electricity is generated by solar energy

By the end of 2023, photovoltaic solar arrays provided an estimated 6.5% to 7% of the world's electricity, marking a continued rise in its contribution to global energy generation.
