Wind power, solar power and battery storage -- all in one location. The Wheatridge Renewable Energy Facility is the first development of its scale in North America to co-locate wind and solar generation ...

Origis Energy has secured financing for the 150-MW Wheatland solar project in Indiana, marking a significant step in its renewable energy initiatives.

Scheduled for completion in the first half of 2026, this project is backed by a long-term power purchase agreement (PPA) with CenterPoint Energy. Origis will act as the developer, owner, ...

Origis Energy, one of America's leading renewable energy and decarbonization solution platforms, today announced it has secured a tax equity commitment from J.P. Morgan for the ...

The Wheatland Solar Project, developed by Origis Energy, is a 150 MW_{ac} utility-scale solar initiative located in Knox County, Indiana. The project is scheduled for completion in the first half of 2026 and ...

The portfolio financing package supports two major Origis Energy projects. The Wheatland Solar project in Knox County, Indiana, will provide 150 MW_{ac} of solar capacity and is ...

Rural solar doesn't just benefit the farms--it benefits the grid. Many producers generate more energy than they use during peak daylight hours, feeding clean power back into the system.

The Wheatland Solar project in Knox County, Indiana, will provide 150 MW_{ac} of solar capacity and is slated for completion in the first half of 2026. It is supported by a Power Purchase ...

J.P. Morgan has made a new tax equity commitment and initial funding to Origis Energy for the 210 MW Wheatland solar farm project in Knox County, Indiana. This will provide capital ...

We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025

Wheatgrass solar power generation

to about 21% in 2027. In our STEO forecast, utility-scale solar is the fastest ...
