What is smart microgrid concept based AC DC & Hybrid mg architecture?

Smart microgrid concept-based AC,DC,and hybrid-MG architecture is gaining popularity due to the excess use of distributed renewable energy generation(DRE). Looking at the population demand and necessity to reduce the burden,appropriate control methods,with suitable architecture,are considered as the developing research subject in this area.

What is AC microgrid?

The AC microgrid features two load terminals,a purely DC load terminalcomprising mobile,fan,and personal computer,supplied by the AC bus through a rectifier. An electric vehicle charger,considered a DC load in the AC microgrid,is connected through a rectifier.
