Solar energy is generated by two technologies: photovoltaic (PV) and concentrated solar power (CSP). Using semi-conducting materials, such as silicon, PV panels convert sunlight directly to electricity.

“March 31, 1975. The place: Lower Forge wilderness camp on the Batsto river. It was a balmy day, but the night grew very still, and cold. We had spent part of the day ...

Mullica Wilderness Campground didn't seem too “wilderness” to me, as a few people just parked on the nearby sand road and walked in. We reserved at Atsion, although ...

Howdy folks, We were planning a hike on this trail, but I was just wondering if anyone could let me know how the canopy is on the trail. Does it provide decent cover? Also, ...

Discover how solar energy can transform your remote cabin experience, providing eco-friendly power, independence from the grid, and modern comforts even in the most secluded wilderness locations.

To explore options for minimizing these impacts, Valley Electric Association (VEA) and US Fish and Wildlife Service worked together to construct a wildlife-friendly solar power generation facility in the Mojave Desert ...

As the number of humans diminish there would be less and less need to expand into wildlife areas and slowly the wilderness would take back what was once theirs. You can't tell ...

More than 3,000 Acres Transferred to Forked River Mountain Wilderness Area in Lacey Township (May 3, 2023--Chester, NJ)--The Nature Conservancy (TNC) announced ...

To create an effective solar energy system in the wild, several factors must come to fruition, from site selection to technology deployment and maintenance strategies.

Wilderness Solar Photovoltaic Power Generation

Potential benefits and impacts to wildlife and their habitats are a primary consideration during planning and development of utility-scale photovoltaic (PV) solar energy facilities.

Sustainable energy usage is a natural priority for the business across all its areas of operation, with meaningful progress already being made at 18 solar-powered Wilderness camps, which currently ...

As one of the world's leading conservation and hospitality companies, Wilderness has driven a major solar conversion and sustainable energy programme in the majority of its camps across Africa.
